

August, 2008

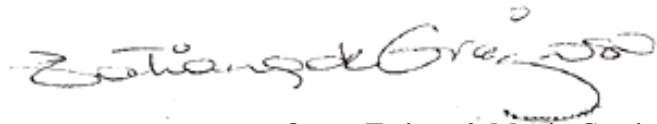

Last month, our daughter Tatiana Grazioso, was transferred from Guatemala to Jackson Memorial Hospital to receive critical treatment after an ATV accident. After her arrival, she spent a couple of days in the Pediatric Intensive Care Unit before having surgery and being moved into the Adolescent Trauma area. We wish to express a most sincere thank you to all the individuals who cared after her while in the hospital. The treatment we received both from doctors and nurses was exceptional.

In particular we want to thank Bridgette Wilson and Priscilla fro PICU area, and Libardo Lozano from the adolescent Trauma unit who were very attentive to our daughters needs and made her feel at ease at all times.

In addition we wish to thank Carmen Elena Lopez and Roly Jaimot from the Hospitality Department who were looking out after us from the moment we arrived through this whole time. The support and friendship provided to our family and friends by them made a big difference.

Our gratitude goes beyond words and is not limited to the above mentioned people only so extend our feelings to all the staff, who in their own way helped Tatiana continue with her recovery.

Sincerely,

Oscar, Tatiana & Martin Grazioso
